Subject: Average Noise Barrier Material and Installation Costs

Based on current noise barrier pricing information, the statewide average cost for noise barriers is \$42 per square foot (\$/SF). The cost is based on the most recent years of historic data. This estimate only includes noise barrier material and installation costs, so any additional costs such as utility relocation, ROW acquisition, earthwork, etc. should be accounted for separately. The updated average cost is to be used for all noise studies effective immediately.
